CAUTION CAUTION CAUTION

Dangers of Vaping

Trying to kick the habit of smoking? Vape pens or E-cigs had the intentions of helping people get over their cravings, however, unless the user closely monitors the amount of nicotine and **REDUCES** it over time the cravings will not stop. E-cigs are **not regulated by the FDA** and unfortunately may contain just as many carcinogens as cigarettes, it is best to avoid nicotine in **ANY** form. **Nicotine is one of the most addictive drugs**, it affects the **heart, lungs, mouth, circulations, nervous system, hormones, GI system and pregnancy**. The mouth piece of an E-cig has a temperature control of 200-400 degrees, the higher the temp **the greater chemical release** and the greater the risk for side effects. Known side effects may include **oral cancers, dry mouth, airway irritation and resistance, coughing, increased blood pressure, heart rate and nausea/vomiting**.

MARIANO & *Mariano*

Dr. Alissa Mariano joins her father Dr. Vincent J. Mariano of EMA this August as a Board Certified Prosthodontist with her degree from Tufts University.

Digital Dentistry

Pleased to announce the addition of the **TRIOS** digital scanner for computer assisted dental procedures. Digital scanning replaces conventional impression taking, expedites the fabrication of dental restorations and our EMA patients will take satisfaction in the ease of this new simplified procedure.

Congratulations

Amanda, your EMA family wishes you a long life filled with happiness, health & wellness.
